About SIS

We have been trusted partners to the bookmaking industry for over 30 years. SIS delivers fast, reliable and high-quality content to operators all over the world.

This is achieved via our established satellite network and more recently, SIS Stream – our innovative, multi-platform streaming service.

We invest continually in our technology to ensure consistent delivery.

Why choose SIS

Trusted partner to the industry

Established satellite network

Over 30 years in the betting industry

Industry leading streaming platform

SIS Stream: Overview

With digital channels increasingly important in the delivery of content, SIS is delighted to offer an industry leading, multi-platform streaming service with a global reach.

For both retail and online, SIS Stream offers ultra-low latency, unprecedented flexibility and almost unlimited capacity for new and bespoke content.

SIS can deliver content faster than traditional satellite methods, ensuring your customers' betting experience is even better.

Key benefits

Ability to deliver any content anywhere

Industry leading streaming capability

Optimised for betting

SIS Stream Online

We have invested in our own video delivery network and web streaming platform, which has been optimised for betting and is highly scalable.

SIS Stream Online allows operators to offer even more content which can include their own, SIS exclusive or third-party content from all over the world. This gives punters a more varied and enjoyable viewing experience.

Features & Benefits

Light-touch integration

Low latency optimised for betting

Ability to take any content and deliver anywhere

SIS content available:

UK greyhounds (available to non-UK customers)

Premier international horse racing events

For our full range of streaming content please request our Content brochure or visit our website.

SIS Stream Retail

SIS Stream enables bookmakers to bring the power of digital delivery not only to online platforms but also to the high street betting shop.

Bookmakers are now able to stream any sporting content via internal network, public internet or even satellite IP network to any destination globally and tailor their shop experience by region, shop or even down to individual screens.

Features & Benefits

Multiple delivery modes for your retail estate

Localisation options available

Easy integration

SIS content available:

SIS channels

3rd party content

For our full range of streaming content please request our Content brochure or visit our website.

Virtuals Connect

SIS Stream now allows betting operators of all sizes to offer their customers high-quality content from Inspired Gaming Group.

Virtuals Connect uses the reliability and low latency of SIS Stream to deliver Inspired's proven content to bookmakers who no longer need to acquire and maintain their own hardware.

This innovative service lowers the point of entry for many operators who wish to give their customers Inspired's market-leading virtuals games.

Features & Benefits

Low latency

High-quality content

Cost effective for smaller operators

Branding options available

49s Connect

A staple for retail punters for over a decade, 49s-branded virtual horse and greyhound racing games are now available to online customers for the very first time.

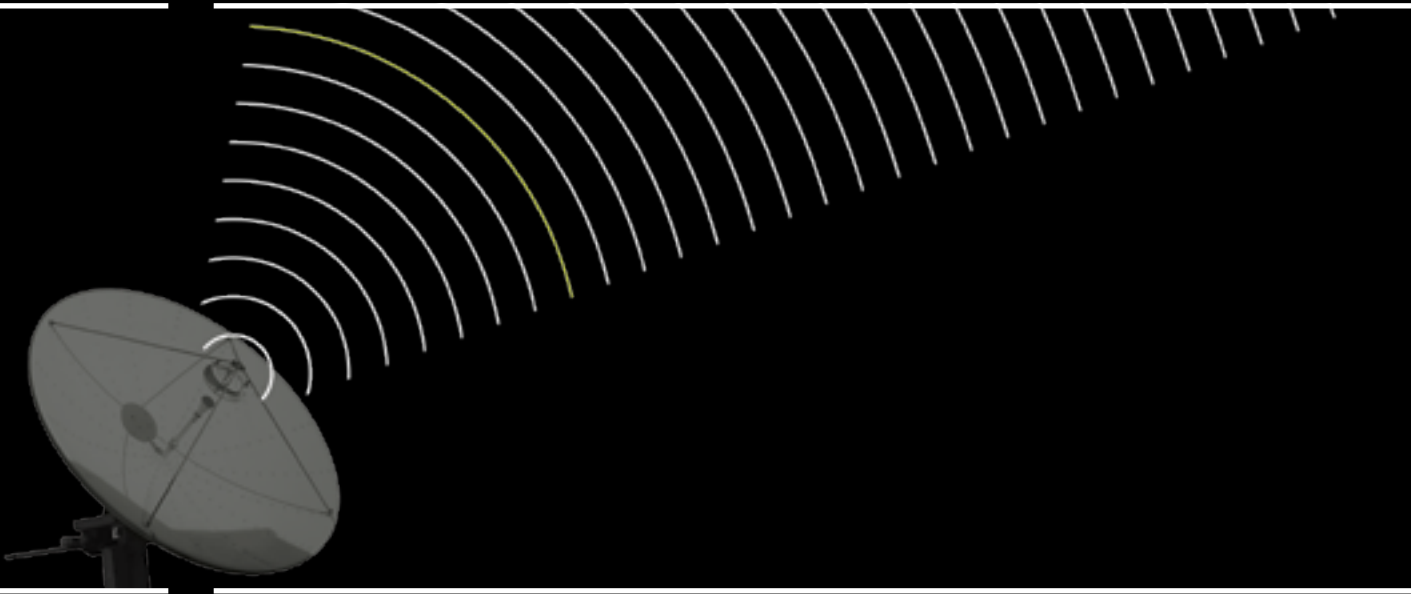

Harnessing the power of SIS Stream and its low-latency technology, online operators are now able to offer their customers all the best races from Portman Park, Sprint Valley and Steepledowns, in addition to greyhound racing from Brushwood and Millersfield.

Satellite Delivery

Customers trust us to deliver robust and reliable distribution to their shops in the UK, Ireland and overseas.

We can deliver our own SIS channels or assist in production and delivery of customer-owned channels to a single shop or across an entire estate.

Complex Automated Production

We can now offer an easy-to-integrate system that significantly upgrades the production and delivery of video content to the betting industry.

CAP features a flexible production environment which means smaller headcount for operators of all sizes.

The system, which has been rolled out across SIS-branded channels, can be delivered to any broadcast system required. You can even control the content and output of a channel remotely via a web browser.

Key Benefits

- Scalability**

CAP can deliver all sizes of outputs, from a single feed to full channel production, without lengthy development
- Multi-platform**

We can provide outputs to any distribution platform, depending on your requirements
